# Optical Fiber Cleaning Stick

Ascentac CleMate100

Dry Cleaning with Excellent Cleaning Performance

## Feature

- Suitable for all kinds of fiber-optic connector mating sleeves, bulkhead adapters or receptacles
- Dry cleaning without using any solvent
- No adhesives, binders, or fibers to leave residues
- No lint, fluff or dust particles left
- Easy-to-carry and disposable design

## Application

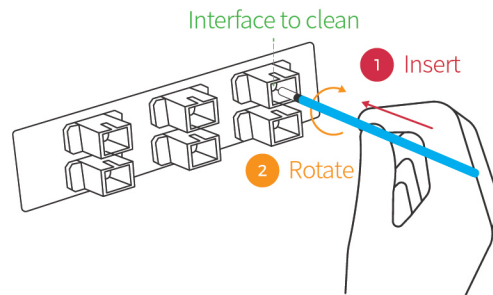

- Precision instruments cleaning
- Optical fiber equipment or components in the process of cleaning or sales as accessories
- Construction or maintenance of optical fiber communication project

## Introduction

Ascentac FiberClear CleMate100 Series, Optical Fiber Cleaning Stick, is designed for cleaning fiber-optic connector mating sleeves, bulkhead adapters or receptacles. The cleaning sticks are supplied in size 1.25mm for MU & LC and 2.5mm for SC, SC2, FC, ST & DS.

The series delivers a first-class level of cleaning performance. Users are only required to properly and straightly insert the cleaning stick into adapters or receptacles and rotate the stick with sufficient pressure. The dirt, dust, oil or grease will be easily removed.
